Re: Spanish ports - Strike actions announcement / Update Friday 19/05/2017

Dear Valued Customers,

Following the process of Port Law reform in Spain, the Parliament finally approved yesterday the pending Royal Decree in accordance with the EU requirements.

Spanish Parliament approval regrettably doesn't count with the support of the Unions, hence further strike actions cannot be ruled out.

It is still likely that Spanish port operations may go slow, resulting from a lack of gangs, and that productivity rates will be indeed negatively impacted.

Please be aware that this may severely impact the pro-forma of our vessel schedules.

As always, we will inform you of any major updates related to schedule changes and necessary contingency plans as a result of the above.

Yours Sincerely

CONTAINER HISPANIA LINES
